

AquaFree Ears

For Drying Water and Moisture in the Ear Canal

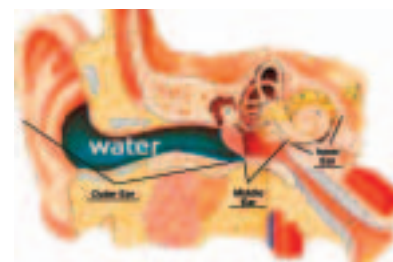

Help in prevention of swimmers ear (Otitis Externa)

Micro spray mechanism that helps remove and dry ear water

Swimmer's ear is an inflammation of the outer ear, following swimming, diving, surfing or showering. AquaFree Ears helps prevent swimmer's ear, by drying up excess moisture.

AquaFree Ears is an ear-water removal and drying aid product formulated to help relieve ear discomfort due to trapped ear-water, also helps to prevent harmful effects such as bacteria or fungal infections and pain. **AquaFree Ears** combines a unique formula in a spray device.

AquaFree Ears formula is activated when in contact with water and helps remove moisture from the ear canal. The micro spray mechanism allows optimal dispersion of **AquaFree Ears** in the ear for an immediate result.

AquaFree Ears assists in:

- Relieving ear discomfort due to trapped ear-water
- Preventing harmful effects such as bacteria or fungal infections and pain.
- Replaces the nuisance trials to dry-up ears after water related activities such as playing with q-tips, hair dryers or tilting head or jumping on one foot...

Advantages

- Easy to use
- Optimal dispersion for best results
- Safe & Effective
- Clinically proven
- Recommended by ENTs.

Ingredients:

Isopropyl alcohol, Glycerin and Rose oil.

The ideal remedy for removing water trapped in the ear (prevention of Swimmer's Ear).
