

NAVEH-VISION™

All Natural Total Eye-Care

A new line of natural ophthalmic preparations formulated with purified herbal extracts, developed to provide long lasting relief to tired, sore and irritated eyes and provide protection from environmental factors that could affect the fragile ocular structures.

Atmospheric pollution, smog, pollen and other allergenic sources, foreign substances in the eye, prolonged exposure to sun light, prolonged exposure to tv screens, monitors, irritation caused by chloride in swimming pools, prolonged wear of contact lenses.

Infected Eye

Sun, wind, dust, air conditioning and other environmental irritant factors

A natural solution formulated with pure extracts of Chamomile Matricaria and Euphrasia officinalis.

The extract of Chamomile Matricaria is widely used in ophthalmic preparations because of its soothing, antiseptic and anti-inflammatory properties. The extract of Euphrasia officinalis possesses natural astringent, antiseptic and anti-inflammatory properties, so helping to decrease the ocular inflammation, irritation and redness.

Provides natural relief and comfort to red, bloodshot, swollen, irritated and inflamed eyes.

Irritated Eye

Seasonal relief for irritation and discomfort of the eye due to exposure to pollen, dust and other allergens

Formulated with pure herbal extracts of Calendula and Hamamelis.

The extract of Calendula, due to its content of flavonoids, has been shown to speed up the physiological wound healing process. The extract of Hamamelis exerts astringent and soothing properties.

Brings fast and long lasting relief to eye symptoms such as irritation, burning, itching, foreign body sensation, due to ocular allergy.

Dry Eye

Prolonged exposure to monitors and TV screens

Natural formula based on the combination of hyaluronic acid and pure extract of Aloe vera.

Hyaluronic acid is a well known natural lubricant with excellent viscoelastic properties similar to that of the physiologic lachrymal film. The extract of the leaves of Aloe Vera is widely used in ophthalmic preparations for its anti-inflammatory and wound healing properties.

Moistens the ocular surface and provides long lasting relief and protection.
