

# MAGNOX®

## Patented Magnesium Supplement

has been clinically proven to be superior in intracellular absorption to most commonly available magnesium preparations.

**Naveh-Pharma** presents **MAGNOX**, a unique, patented magnesium composition, which is clinically proven to be the most readily absorbed and efficacious supplement available.

**Magnesium** is the fourth most abundant mineral in the body and is essential to good health.

**Magnesium** is needed for more than 300 biochemical reactions in the body.

**It helps maintain normal muscle and nerve function, maintains steady heart rhythm, supports a healthy immune system, and keeps bones strong.**

Large epidemiologic surveys have found that most people in Western societies do not consume enough magnesium rich foods. Magnesium deficiency is a root cause of a number of chronic diseases. Doctors and patients are aware of the need to address magnesium deficiency, and large quantities supplements are sold by pharmacies and health food stores. However, magnesium can only be absorbed by the cells as a free ion ( $Mg^{++}$ ). Recent clinical study, found that most available magnesium supplements are composed of magnesium citrate, aspartate and lactate and considered most bio-available, are actually forming an un-ionic complexes of magnesium, which cannot be absorbed into the cells and are therefore ineffective at combating magnesium deficiency.

**These findings have been backed by a recent clinical trial conducted by Schechter et. Al, which is about to revolutionize the understanding of magnesium absorption.**

**Magnox** has been formulated based on this recent scientific breakthrough.

**Magnox** has already proven extremely successful in Israel.

In comparison to other magnesium supplements, which have little or no effect, the benefits of Magnox on vitality and cramps are immediate and profound.

**Magnox** is made of pure magnesium extracted from the Dead Sea in Israel.
