NATURAL CLEANSING OF FLAKES AND YELLOW CRUST ACCUMULATED IN BABIES

Cradle-Cap
Cleanser

Baby

For cleansing flakes
and yellow crust accumulations
in babies

For cleansing flakes and yellow crust accumulations in babies.

Cradle-cap (infantile or neonatal) is a yellowish, patchy, greasy, scaly, and crusty skin rash that occurs on the scalp of newborns. Cradle cap most commonly begins sometime in the first 3 months. The rash is also prominent around the ear, the eyebrows, or the eyelids. It is extremely common, with about half of all babies affected.

Cradle Cap Cleanser is a unique, all-natural extraction of olive oil.

Applying **Cradle Cap Cleanser** 5-10 minutes before bathing, eliminates the flakes or the yellow crusting. It all washes away in the bath.

Available in a spray bottle of 30ml.
